What is BMX?
BLENDED MOBILITY PROJECT FOR SOCIETY 5.0 HR

Blended mobility is an educational concept that **combines physical academic mobility, virtual mobility and blended learning**. Blended mobility paradigm may be executed through various formats; it can take a form of COIL Plus (COIL engagement and short-term mobility combined), or virtual exchange programs with an option of studying abroad to involved overseas partner institutions. JIGE also extends its scope of online international education to virtual student mobility, and co-teaching& co-learning arrangement using ICT across the international classrooms.
